PROFILE

Chiu Ching-Ting (邱敬婷), born in 1983 in Taipei, Taiwan.

Chiu initially studied Visual Communication Design at university. After graduation, she shifted her focus to fiber arts, with her early works primarily centered on wool felting techniques and innovative textile design incorporating mixed media. In 2012, she earned certification as a Wet Felting Instructor from the Taiwan Wool Felting Promotion Association, accumulating extensive experience in both artistic creation and craft education.

In pursuit of a more nuanced exploration of craft aesthetics, she entered the Graduate Institute of Applied Arts at Tainan National University of the Arts in 2016 and obtained her Master of Fine Arts (MFA) in 2019. Her practice specializes in fiber materials and textile-based expressions. Through weaving techniques, she reinterprets the spatial relationships between point, line, and surface, integrating the tactile qualities of fiber with personal life experiences, sensory perceptions, and broader reflections on social consciousness and collective relationships.
